Jocelin Helsa

Data Analyst · Python · SQL · Power BI · Excel (VBA, Power Query) · Statistical Modelling

Sydney, Australia · celinhelsa28@gmail.com · +61 450 149 188 · LinkedIn · Analytics Portfolio · Certificates

SUMMARY

Data analyst with an Actuarial Science degree (GPA 3.9/4.0) and 1.5 years of end-to-end quantitative analysis for research consulting and nonprofit programs. I run the full data lifecycle, from survey design and validation to statistical modelling, dashboards and stakeholder reporting, and build automated pipelines that cut manual reporting work.

SKILLS

Programming & querying	Python (pandas, NumPy, SciPy, statsmodels, scikit-learn, Matplotlib, Seaborn), SQL (BigQuery), R
Spreadsheets & automation	Advanced Excel (VBA/Macros, Power Query, Pivot Tables), Google Sheets (Apps Script)
Visualisation & BI	Power BI (DAX, star schema data modelling), Looker Studio, Tableau
Statistics & modelling	Hypothesis testing, regression and GLMs, logistic regression, gradient boosting, time series forecasting, RFM segmentation
Data collection & quality	Survey design (KoboToolbox), sampling, data validation and cleaning, data governance, ETL
Ways of working	Stakeholder reporting, technical documentation, ClickUp (Agile)
Languages	Indonesian (native), English (IELTS 8.5), German (B1)

EXPERIENCE

Data Analyst · QED Research Consulting, Indonesia · Aug 2024 – Mar 2026

- Delivered end-to-end quantitative analysis for feasibility studies, market research and impact evaluations across education, agriculture and sustainability programs.
- Designed KoboToolbox surveys and validation checks, then cleaned and analysed complex datasets with Python, R and SQL to find trends, risks and opportunities.
- Built Power BI dashboards and turned findings into conclusion notes and final report sections for technical and non-technical stakeholders.

MEL (Monitoring, Evaluation & Learning) Coordinator · KOMit Foundation, Indonesia · Aug 2024 – Mar 2026

- Built automated reporting pipelines in Python and Excel (VBA, Power Query), and audited data processes to resolve anomalies.
- Developed pre- and post-activity evaluation tools and tracked program metrics with internal teams, applying statistical modelling and forecasting.

Customer Service Specialist · Commonwealth Bank, Sydney · Aug 2026 – Present

Service Support Centre Consultant · Tabcorp, Sydney · Mar 2026 – Jul 2026

PROFESSIONAL PROJECTS

Management Information System Support for an International Climate Adaptation Program ·
QED Research Consulting, Data Analyst · 2026

- Designed and implemented relational data models to consolidate inputs from diverse enterprise source documents.
- Developed VBA and automation scripts to optimise data extraction, transformation and loading (ETL) workflows.
- Collaborated with stakeholders to translate system requirements into a centralised data architecture.

ReFive Program by Nuplas Solutions Malaysia & KOMit Foundation · KOMit Foundation, Data Analyst · 2025–2026

- Designed and maintained a transactional database system that enabled real-time updates and automated quality validation.
- Developed scripts to enforce strict data cleaning protocols, ensuring database integrity and zero duplication across systems.
- Integrated multiple data streams to build comprehensive relational datasets for end-to-end value chain reporting.

Market Research for a B2B Circular Economy and Sustainable Materials Company in Malaysia ·
QED Research Consulting, Data Analyst · 2025

- Designed digital survey instruments and built automated data validation tools for pre- and post-data collection.
- Conducted market research, including opportunity analysis, commercial viability analysis and profitability modelling.
- Structured analytical findings into comprehensive recaps and developed dashboards for stakeholder reporting.

Feasibility Analysis for a Coffee Initiative Program by a Global Agribusiness Company ·
QED Research Consulting, Data Analyst · 2025

- Designed digital survey instruments and built automated data validation tools for pre- and post-data collection.
- Conducted quantitative analysis, including demographic segmentation and behavioural analysis, to identify growth opportunities and participant acquisition strategies for a new coffee entrepreneurship initiative.
- Developed summary dashboards and reports to deliver data-driven recommendations to key stakeholders.

Midline Evaluation for a Women Empowerment Program in Agriculture by a Child-Focused NGO ·
QED Research Consulting, Data Analyst · 2025

- Designed digital survey instruments and built automated data validation tools for pre- and post-data collection.
- Performed statistical modelling and analysis to evaluate program performance and operational impact.
- Visualised findings through demographic and trend tabulations, presenting clear insights to stakeholders.

Impact Evaluation for the TELADAN Program by Tanoto Foundation · QED Research Consulting, Data Analyst · 2024–2025

- Conducted data validation and quantitative analysis, including data cleaning, descriptive statistics and demographic tabulation.
- Performed comparison analysis and regression modelling, and built a visualisation dashboard to illustrate trends.
- Assisted in summarising analytical findings for the final evaluation report and technical documentation.

Monitoring & Evaluation for the Cargill CORN Program by Save the Children ·
KOMit Foundation, MEL Coordinator · 2024–2025

- Monitored program activities and managed multiple data streams to evaluate project outcomes.
- Developed pre- and post-activity evaluation tools to assess improvement among participants and market actors.
- Collaborated with cross-functional teams to track key operational metrics and generate insights for continuous improvement.

Impact Evaluation for a Vocational Training Program by a US-based International Child Protection NGO ·
QED Research Consulting, Data Analyst · 2024–2025

- Researched evaluation indicators to develop robust quantitative and qualitative survey tools.
- Created automated data validation tools and managed interview session tracking to ensure a smooth collection process.

Supply Chain Monitoring & Evaluation: Agricultural Sustainability · QED Research Consulting, Data Analyst · 2024

- Developed an automated data validation pipeline in Power Query to support M&E activities for an international NGO.
- Performed tool testing, created test cases and trained end users to ensure quality and smooth adoption.
- Helped create technical documentation and data checking protocols to guarantee data consistency and reliability.

EDUCATION

Bachelor of Actuarial Science · Brawijaya University, Indonesia · Aug 2020 – Mar 2024

- Graduated with honours, CGPA 3.9/4.0.
- Thesis Research (*Stock Portfolio Optimization*): applied Python and quantitative analytics to build a Recurrent Neural Network (RNN) and simulation models for stock portfolio optimisation.
- Applied Project 1 (*Endowment Insurance Prototype*): calculated mortality tables and developed a Python-based benefit and premium calculator, deployed as a web application.
- Applied Project 2 (*Joint-Life Insurance Estimation*): estimated premiums and reserves using mortality-morbidity tables and transition probability matrices to model financial outcomes.

CERTIFICATIONS AND LICENSES

- Coursera Google Advanced Data Analytics Certificate
- Coursera Google Business Intelligence Certificate
- Coursera IT Automation with Python Certificate
- Coursera Machine Learning Specialization Certificate
- TensorFlow Developer Certification by Google
- Bangkit Program Certificate of Completion (Distinction Graduate)
- Actuarial Exam Completion Certificate by PAI (The Society of Actuaries of Indonesia): Financial Mathematics, Probability & Statistics, Accounting, Actuarial Mathematics, Risk Theory
